

Tech News Briefing — June 14, 2026

This week was dominated by capital flooding into AI infrastructure: Anthropic and SpaceX both filed for IPOs, Alphabet raised \$80B and SoftBank committed \$52B to European data centers, while Databricks is reportedly raising at a ~\$170B valuation — a signal that "AI as enterprise infrastructure" is now the default investment thesis. On the enterprise side, agentic AI crossed from pilot to production (NTT DATA/Google Cloud, Snowflake/Anthropic, and a 97% agent-deployment stat), with the identity layer racing to catch up — Auth0 now treats AI agents and MCP servers as first-class identities, directly touching your CIAM remit. Security demands immediate attention: June Patch Tuesday set a record at **198 CVEs**, and three separate 9.8-severity RCEs (Oracle PeopleSoft, Splunk, GitHub) plus a max-severity n8n flaw are being actively exploited or weaponized. The PeopleSoft and Splunk bugs in particular warrant a same-week patch review given enterprise exposure.

1. Top Tech Stories

- **Anthropic files for IPO as AI capital deployment hits record levels.** Alongside Anthropic's filing, SpaceX raised \$75B in an IPO to fund space-based AI data centers, Alphabet raised \$80B for AI infrastructure, and SoftBank announced a \$52B European data-center blitz. [Tech Startups](#)
- **Databricks in talks to raise at \$165B–\$175B valuation.** Investors are treating it as foundational enterprise infrastructure for analytics, AI, and data engineering. [Solutions Review](#)
- **Data-center backlash intensifies.** Ohio suspended a major data-center tax incentive after exemption costs surged, and residents pushed a ballot measure that could ban hyperscale facilities statewide; AI data centers in drought-hit areas are sharpening water/power concerns. [IMFounder](#)
- **A U.S. state launches a historic lawsuit against OpenAI.** Part of a broadening regulatory front as the largest AI labs head toward public markets. [IMFounder](#)

2. Your Domain (AI / EA / Data & Analytics / Platform Engineering / IAM / Payments / Subscriptions)

- **Agentic AI goes mainstream in the enterprise.** 97% of executives report deploying AI agents in the past year, with 52% of employees already using them; NTT DATA expanded its Google Cloud collaboration (June 8) and Snowflake + Anthropic partnered to accelerate *governed* AI adoption. [NTT DATA](#) · [Snowflake](#)
- **SEI + Accenture release an AI Adoption Maturity Model (June 8).** A framework to baseline AI adoption and scale with predictable outcomes. [Carnegie Mellon SEI](#)
- **Payments consolidation continues.** REPAY completed its \$372M acquisition of Kubra, NMI acquired Fee Navigator, and The Clearing House is preparing on-chain deposit settlement as big banks respond to the stablecoin challenge. [Digital Transactions](#) · [Glenbrook](#)
- **UK FCA brings BNPL under supervision starting July 15, 2026.** PayPal, Klarna, and Clearpay will add affordability checks and transparency requirements. [Payments Dive](#)
- **CIAM market projected to grow from \$3.5B (2026) to \$8.2B (2033); SCIM 2.0 is now table-stakes.** Auth0, WorkOS, Frontegg, Stytech, and Descope are all shipping SCIM provisioning/de-provisioning. [Security Boulevard](#) · [OpenPR](#)
- **Dataiku named Snowflake's 2026 Product Partner of the Year — AI Platform.** Reinforces the Snowflake/Dataiku stack for governed enterprise ML. [Solutions Review](#)

3. Supported Applications

- **Auth0 (Okta) ships identity for AI agents.** Auth0 now secures MCP servers and autonomous agents as first-class identities with granular control and auditing — directly relevant if you're deploying agents against your CIAM stack. (*Announced late May; still the most material Auth0 news.*) [Okta Newsroom](#)
- Nothing else notable this week for Zendesk, Site24x7, PagerDuty, Permit.io, CyberSource, Stripe, Maxio, or Chargify.

4. AI & Software Development

- **Claude Fable 5 lands in coding tools (June 9).** Now selectable in both Claude Code and GitHub Copilot; Claude Code remains positioned as the most capable autonomous coding agent. [The New Stack](#)

- **GitHub Copilot pricing shifts.** Usage-based flex billing went live June 1 and a new \$100 Max plan was announced, as Cursor and Claude Code pressure its position. [Lushbinary](#)
- **Windsurf rebrands to Devin Desktop (June 2).** Continued consolidation of the AI coding-tool market. [The New Stack](#)
- **Anthropic warns of a possible coordinated industry "pause."** If AI systems begin self-improving too quickly, the company says the industry may need to slow down. [Tech Startups](#)

5. Cybersecurity

- **⚠ Record June Patch Tuesday: 198 CVEs, 32 critical, 3 zero-days.** The largest release in the program's history — prioritize triage this cycle. [N-able](#)
- **⚠ Oracle PeopleSoft RCE actively exploited (CVE-2026-35273, CVSS 9.8).** Unauthenticated RCE over HTTP; the ShinyHunters extortion crew is already breaking into enterprise systems. Patch immediately if you run PeopleTools. [N-able](#)
- **⚠ Splunk Enterprise critical RCE (CVE-2026-20253, CVSS 9.8).** Unauthenticated file operations leading to remote code execution. [N-able](#)
- **⚠ GitHub critical RCE (CVE-2026-3854).** Wiz researchers found an RCE in GitHub's internal Git infrastructure affecting both GitHub Enterprise Server and GitHub.com. [SecurityWeek](#)
- **⚠ Max-severity n8n RCE allows full platform takeover.** A critical flaw in the popular AI workflow automation platform — review exposure if n8n is in your automation stack. [CSO Online](#)
- **Healthcare: Nuance PowerScribe RCE (CVE-2026-26142).** RCE in the radiology dictation platform with patient-data exposure and HIPAA notification implications. [N-able](#)
